v8 supercars is a great australian sporting success story still going strong for over a quarter of a century it was the first local race series to gain a mainstream national following catapulting the likes of peter brock and dick johnson to fame against the backdrop of mount panorama bathurst these days the sport draws huge crowds attracts big dollar tv rights deals and a new generation of heroes have appeared battling over old territory plus a host of new street circuits turning this australian motor sport into a globally recognised phenomenon the v8s have evolved into today s supercars championship creating household megastars such as craig lowndes marcos ambrose jamie whincup and scott mclaughlin supercars gives detailed insight into how each and every championship was won tracking the development of the supercars class between 1993 2010 this comprehensive and absorbing account of a uniquely australian sport is a must for any race fan s bookshelf

this book demonstrates the use of the optimization techniques that are becoming essential

to meet the increasing stringency and variety of requirements for automotive systems it shows the reader how to move away from earlier approaches based on some degree of heuristics to the use of more and more common systematic methods even systematic methods can be developed and applied in a large number of forms so the text collects contributions from across the theory methods and real world automotive applications of optimization greater fuel economy significant reductions in permissible emissions new drivability requirements and the generally increasing complexity of automotive systems are among the criteria that the contributing authors set themselves to meet in many cases multiple and often conflicting requirements give rise to multi objective constrained optimization problems which are also considered some of these problems fall into the domain of the traditional multi disciplinary optimization applied to system sub system or component design parameters and is performed based on system models others require applications of optimization directly to experimental systems to determine either optimal calibration or the optimal control trajectory control law optimization and optimal control in automotive systems reflects the state of the art in and promotes a comprehensive approach to optimization in automotive systems by addressing its different facets by discussing basic methods and showing practical approaches and specific applications of optimization to design and control problems for automotive systems the book will be of interest both to academic researchers either studying optimization or who have links with the automotive industry and to industrially based engineers and automotive designers

with an unforgettable voice and exuberant wit she is haunted is a masterful debut exploring issues of identity connection and loss told with remarkable grace and assurance by chinese american australian author paige clark in stories charged by the complexities of mother daughter relationships grief exes and the profundities of friendship she is haunted features injured ballerinas cloned dogs and competitive call centers in settings as far ranging as future and present australia new york city s chinatown and suburban california a mother cuts her daughter s hair because her own hair begins falling out a woman attempts to physically transform into her dead husband so that she does not have to grieve a woman undergoes brain surgery in order to live more comfortably in extreme temperatures braiding the real and the surreal both playfully witty and deeply insightful these stories show us characters striving to make sense of the grand themes of family love death and our changing world she is haunted flags paige clark as a wondrous and wise new literary talent
