providing a metaphysical grounding for liturgical participation this book argues that active participation in the liturgy must be understood principally as our participation in god s act particularly in the act of christ and only secondarily as our ritual involvement utilizing neoplatonist philosophy kjetil kringlebotten proposes that this should be understood in terms of theurgy which is the human participation in divine action which finds its consummation in the incarnation of christ without the incarnation all acts will remain extrinsic and imposed but acts can become real and intrinsic precisely because the incarnation makes possible true union with the divine a metaphysical union in distinction without confusion because this union is not extrinsic through union with christ as the one

common focus of the divine human relation we can have true union with god and may offer true worship in order to make sense of active participation then we need to understand theology in theurgic terms where theurgy is understood not as a mechanical coercion of god but as a participation in his act in creation and through christ as the true theurgist the master theurgist whose work transforms our act and the liturgy

in this exciting work samuel powell offers a new constructive and systematic vision of creation by interpreting it in terms of contemporary science and trinitarian theology powell s work unfolds in three stages building on the multiple ways the doctrine of creation actually functions for christians he first analyzes its regulative dimension even in all the multiplicity of historical christianity he shows the doctrine commits christians to a particular set of normative beliefs about the world and god s relation to it second powell builds on the doctrine s hermeneutical potential it allows christians both to interpret the meaning of creation in terms of other prevalent philosophical religious or scientific ideas and also to interpret the world as disclosed by scientific theory in theological terms in the heart of his book powell correlates creaturely characteristics with their participation in god through the trinitarian persons finally in light of his findings powell drives home the often ignored ethical dimension of the doctrine especially in relation to the environment our consumerist lifestyle and eschatology powell s bold proposal harvests from two of the most fruitful fields of recent theology trinitarian theory and religion and science and crafts a creative new vision of how we and all creation participate in the life and work of the triune god

ten years after over half a million christians signed their names to a statement of conscience clarifying where they stood the three issues dealt with in the manhattan declaration are of more cultural importance than ever the main difference now as opposed to then is the state has since claimed authority not only over life but also over marriage and religious liberty in life marriage and religious liberty christian scholars and authors writing from various evangelical protestant orthodox and catholic traditions evaluate the current cultural landscape and update the manhattan declaration call to christian conviction

how does liturgy impact the formation of faith the protestant church has traditionally emphasized human reason and doctrinal knowledge but there is another method with great formative power participation in liturgy human beings gain important knowledge not only through traditional cognitively focused learning but also through practice and participation and because knowledge is wholistic an inability to express an idea in language does not necessarily signify an absence of knowledge this book shows how liturgy transmits knowledge that transcends human reason we repeat the liturgy in weekly public worship and its contents are inscribed on our minds and bodies contrary to common belief this is also true for children and cognitively challenged individuals they may be unable to verbally express the contents of their faith in a way that satisfies normal adult expectations but these two groups of people are capable of rich religious experiences this book explores how welcoming them into experience and practice of worship and sacrament can benefit children cognitively challenged church members their families and the church community as a whole and makes us all a more inclusive community in christ
